Treatment Room

Policy
Harvard Pilgrim reimburses facility treatment room services directly related to the procedure(s) that are provided on the same day in which the treatment is rendered.

Policy Definition
Treatment Room Services consist of those outpatient services, furnished on hospital premises, which require the use of a bed and periodic monitoring for a relatively brief episode of time in order to carry out certain nonsurgical procedures that are not performed in a specialized suite that is otherwise billable. Recovery from the effects of such a procedure is an appropriate use of the treatment room. The use of the treatment room is an expected part of a minor procedure and replaces the charge for operating room and recovery room.

Prerequisite(s)
Applicable Harvard Pilgrim referral, notification and authorization policies and procedures apply. Refer to Referral, Notification and Authorization for more information.

HMO/POS/PPO
• An order is required for treatment room services.
• Notification is required for treatment services that result in an inpatient admission.

Open Access HMO and POS
For Open Access HMO and Open Access POS products, no referral is required to see a contracted specialist.
