Prescription Drug Management Program

Purpose
Our pharmacy formularies and utilization management programs are designed and managed by evaluating the safety, efficacy and cost-effectiveness of drugs. A pharmacy and therapeutics (P&T) committee, consisting of pharmacists and physicians who represent various clinical specialties, reviews the clinical appropriateness of drugs for inclusion in the formulary and approves the criteria (Pharmacy Medical Necessity Guidelines) for pharmacy benefit drugs and products in a utilization management program, such as prior authorization (PA), step therapy (ST), quantity limitations (QL), designated specialty pharmacy (SP). A drug coverage committee (DCC) is responsible for clinical and financial decision-making and makes drug coverage and formulary management decisions with consideration to the information provided by the P&T Committee.

To learn more about our program please visit us at: www.harvardpilgrim.org/provider/pharmacy/

Premium Formulary Prescription Drug Benefit
Harvard Pilgrim’s Premium formulary is strategically designed to cover a wide variety of categories and classes of medications. Exclusions may include cosmetic and high-dollar/low-value drugs and products.
Harvard Pilgrim offers a 3-Tier and a 4-Tier Premium formulary.

3-Tier Program
Covered medications are categorized into one of three tiers. Copayments are determined by the tier in which the drug is assigned, for up to a 30-day supply per prescription or refill. We encourage patients and physicians to discuss pharmaceutical treatment options that are therapeutically appropriate and most cost effective.

- **Tier 1** is primarily made up of generic drugs and select brand-name drugs that the plan has determined to be more effective, less costly or to have fewer side effects than similar medications. Members pay the lowest copayment or coinsurance amount for Tier 1.
- **Tier 2** is primarily made up of brand-name drugs and higher cost generic drugs.
- **Tier 3** is made up of drugs that the plan has not included in Tier 1 or Tier 2. Members pay the highest copayment or coinsurance amount for Tier 3 drugs.

4-Tier Program
Covered medications are categorized into one of four tiers. Copayments are determined by the tier in which the drug is assigned, for up to a 30-day supply per prescription or refill. We encourage patients and physicians to discuss pharmaceutical treatment options that are therapeutically appropriate and most cost effective.

- **Tier 1** is made up of lower cost generic drugs. Members pay the lowest copayment or coinsurance amount for Tier 1 drugs.
- **Tier 2** is primarily made up of generic drugs and select brand-name drugs.
- **Tier 3** is primarily made up of brand-name drugs and higher cost generic drugs.
- **Tier 4** is made up of drugs that we have not included in Tiers 1-3. Members pay the highest copayment or coinsurance for Tier 4 drugs.
Value Formulary Prescription Drug Benefit

Harvard Pilgrim offers a 3-Tier, 4-Tier, and a 5-Tier Value formulary. The Value formulary covers a variety of classes of medications. Exclusions may include cosmetic and high-dollar/low-value drugs and products.

3-Tier Program
Covered medications are categorized into one of three tiers. Copayments are determined by the tier in which the drug is assigned, for up to a 30-day supply per prescription or refill. We encourage patients and physicians to discuss pharmaceutical treatment options that are therapeutically appropriate and most cost effective.

- **Tier 1** is primarily made up of generic drugs.
- **Tier 2** is primarily made up of preferred brand name drugs and some generic drugs.
- **Tier 3** is primarily made up of preferred specialty drugs and non-preferred brand name and specialty drugs. Tier 3 may also include some higher cost generic drugs.

4-Tier Program
Covered medications are categorized into one of four tiers. Copayments are determined by the tier in which the drug is assigned, for up to a 30-day supply per prescription or refill. We encourage patients and physicians to discuss pharmaceutical treatment options that are therapeutically appropriate and most cost effective.

- **Tier 1** is primarily made up of generic drugs.
- **Tier 2** is primarily made up of preferred brand name drugs and some generic drugs.
- **Tier 3** is primarily made up of preferred specialty drugs, non-preferred brand name drugs, and higher cost generics.
- **Tier 4** is primarily made up of non-preferred specialty drugs. Tier 4 may also include selected brand and generic drugs.

5-Tier Program
Covered medications are categorized into one of five tiers. Copayments are determined by the tier in which the drug is assigned, for up to a 30-day supply per prescription or refill. We encourage patients and physicians to discuss pharmaceutical treatment options that are therapeutically appropriate and most cost effective.

- **Tier 1** is primarily made up of lower cost generic drugs.
- **Tier 2** is primarily made up of higher cost generic drugs.
- **Tier 3** is primarily made up of preferred brand name drugs and select generic drugs.
- **Tier 4** is primarily made up of preferred specialty drugs and non-preferred brand name drugs, and select higher cost generic drugs.
- **Tier 5** is primarily made up of non-preferred specialty drugs. Tier 5 may also include selected brand and generic drugs.
Core NH Formulary

Harvard Pilgrim offers a 4-Tier and a 5-Tier Core NH Formulary. Our Core NH formulary offers a prescription drug benefit for small group and individual markets in the state of New Hampshire that ensures members and their physicians have access to a selection of best-in-class medications while helping to keep premiums as affordable as possible.

4-Tier Core NH Formulary

Tier 1 is primarily made up of generic drugs and select brand name drugs. Members pay the lowest copayment or coinsurance amount for Tier 1 drugs.

Tier 2 is primarily made up of preferred brand name drugs and some generic drugs.

Tier 3 is primarily made up of preferred specialty drugs and non-preferred brand name drugs and select generic drugs.

Tier 4 is primarily made up of non-preferred specialty drugs. Tier 4 may also include select brand and generic drugs.

5-Tier Core NH Formulary

Tier 1 is made up of lower cost generic drugs. Members pay the lowest copayment or coinsurance amount for Tier 1 drugs.

Tier 2 is primarily made up of higher cost generic drugs.

Tier 3 is primarily made up of preferred brand name drugs and some generic drugs.

Tier 4 is primarily made up of preferred specialty drugs, non-preferred brand name drugs, and some generic drugs.

Tier 5 is primarily made up of non-preferred specialty drugs. Tier 5 may also include select brand and/or generic drugs.

New-to-Market Drug Evaluation Process

New-To-Market drug products are reviewed for safety and clinical effectiveness by the Plan’s Pharmacy and Therapeutics Committee. We then make a coverage determination based on the Committee’s recommendation. A new drug product will not be covered until this process is completed – usually within 6 months of the drug product’s availability. In the interim, if a physician believes a member has a medical need for the drug product, an exception to coverage should be requested. An approved coverage exception will have the highest cost share tier. If you have questions regarding coverage status of a drug or product, call Provider Services at 800-708-4414.

Prior Authorization Drugs

The prior authorization program is in place for selected drug products that have a specific indication for use, are expensive, or pose significant safety concerns. Each of these medications has clinical guidelines developed by licensed clinical pharmacists, reflecting the latest in evidence-based medicine. A drug may be recommended for placement in the PA program based on various criteria, including, but not limited to:

- Has the potential to be used exclusively for cosmetic purposes
- Is not considered to be first-line therapy by medically accepted clinical practice guidelines
- Has the potential to be used outside of indications granted by the U.S. Food and Drug Administration (FDA)
- Drug products under the PA program require prior approval for coverage through the Utilization Review Process. Medication Request Forms can be found at www.harvardpilgrim.org/provider/pharmacy/.
Step Therapy Prior Authorization (STPA)

Step therapy prior authorization is an automated form of prior authorization that uses claims history for approval of a drug or product at the point of sale. Step therapy programs help encourage the clinically proven use of first-line therapies and are designed so that the most therapeutically appropriate and cost-effective agents are used first, before other treatments may be covered. Step therapy protocols are based on current medical findings, FDA-approved drug labeling and drug costs.

A drug or product is placed in a STPA program when it meets one or more of the following criteria:

- Is not considered to be first-line therapy by medically accepted clinical practice guidelines
- Has a disproportionate cost when compared to other agents used to treat the same disease or medical condition

Members who are currently on drugs or products that meet the initial step therapy criteria will automatically be able to fill prescriptions for a stepped medication or product. If the member does not meet the initial step therapy criteria, the prescription will deny at the point of sale with a message indicating that prior authorization is required. Providers may submit prior approval for coverage through the Utilization Review process.

Quantity Limitations

Quantity limits are designed to limit the use of selected drugs for quality and safety reasons. Administering quantity limits encourages appropriate drug use to assist in reducing drug benefit costs for everyone.

If a member’s physician determines that a quantity in excess of that allowed by the health plan is medically necessary, he/she may request an exception for coverage.

Medication Request Forms can be found at www.harvardpilgrim.org/provider/pharmacy/.

Non-Formulary Drugs (NF)

Certain prescription drugs or products are non-formulary because there are safe, comparably effective, less expensive alternatives available. The suggested alternatives are approved by the FDA and are widely used and accepted by the medical community to treat the same condition as those that are non-formulary. If a member has a definite medical need to continue on a non-formulary drug product, an exception to coverage should be requested.

Utilization Review and Coverage Exception Process

You may use the exception process to ask us to cover a drug that is not listed on the plan’s formulary or limited if listed on the formulary with limitations.

To request a pharmacy prior authorization, refer to www.harvardpilgrim.org/provider/pharmacy/ for the specific drug prior authorization requirements and request forms. Requests may be submitted electronically through PromptPA by visiting Point32Health.PromptPA.com

You can also submit requests via electronic Prior Authorization (ePA), fax or by mail with the appropriate request form to the Pharmacy Utilization Management Department:

Fax: 617-673-0988
Mail: Harvard Pilgrim Health Care
     Attn: Pharmacy Utilization Management Department
     1 Wellness Way, Canton, MA 02021-1166

We will only grant exceptions for clinical reasons. You must give us a statement that explains why an exception is medically necessary, including why the covered drugs on the formulary are not as effective as the requested drug.
Compound Drug Coverage

Compound drugs are covered if: (1) all the active ingredients in the compound are FDA-approved prescription drugs; and (2) either the patient is under the age of 18 or the plan has given prior approval for coverage of the compound.

Specialty Pharmacy Program

Harvard Pilgrim’s goal is to arrange for its members to have access to the most clinically appropriate, cost-effective services. We have designated specialty pharmacies to supply a select number of drugs used to treat complex disease states. These pharmacies specialize in providing these drugs and are staffed with nurses, coordinators, and pharmacists to provide support services for members. Drugs include, but are not limited to, those used to treat Hepatitis C, growth hormone deficiency, infertility, multiple sclerosis, rheumatoid arthritis, and cancers treated with oral drugs.

Members can obtain up to a 30-day supply of drugs by mail from these specialty pharmacies. For questions about the designated specialty pharmacy program, refer to the Plan’s online formularies or contact Provider Services at 800-708-4414. Drugs in the designated specialty pharmacy program are listed throughout the formulary with SP to indicate inclusion in the program. When appropriate, other designated specialty pharmacies and drugs will be identified and added to this program.

Mail-Order Option

Harvard Pilgrim offers our members the convenience and cost savings of a mail service prescription drug program for maintenance medications. Members can order a 90-day supply of these drugs, without going to the pharmacy. The mail order program is administered exclusively by OptumRx Home Delivery.

OptumRx Home Delivery:
   - Phone: 800-860-3161, or
   - Electronically: ePrescribe

Retail90

Harvard Pilgrim members who have prescription drug coverage can purchase a 90-day supply of maintenance medications at retail pharmacies that participate in the OptumRx Retail90 network.

Generally, these are medications that are taken continually for long-term treatment of chronic conditions. Some examples include antidepressants, asthma/COPD medications, cholesterol-lowering drugs, diabetes medications, estrogen therapies, heart medications, high blood pressure medications, oral contraceptives, seizure medications, and thyroid medications.

Members will be responsible for three times their applicable cost-sharing amount for a 90-day supply of maintenance medications at participating retail locations.

Prescriptions must be written for a 90-day supply. Most of our current participating pharmacies participate in Retail90 network.
