Clinical Guideline Coverage Criteria

The plan may authorize coverage of Actemra for Members when all of the following criteria are met:

Giant Cell Arteritis

1. Documented diagnosis of giant cell arteritis

2. Patient is at least 18 years of age

3. Prescribed by or in consultation with a rheumatologist or neurologist

4. Documentation of one (1) of the following:
   a. Inadequate response or adverse reaction to a systemic corticosteroid
   b. Contraindication to systemic corticosteroids
   c. The patient is new to the plan and has been stable on the requested agent prior to enrollment
Juvenile Idiopathic Arthritis

1. Documented diagnosis of polyarticular or systemic juvenile idiopathic arthritis  
   AND
2. Patient is at least 2 years of age  
   AND
3. Prescribed by or in consultation with a rheumatologist  
   AND
4. Documentation of one (1) of the following:  
   a. Both of the following:  
      i. Inadequate response or adverse reaction to one (1), or contraindication to all traditional disease modifying antirheumatic drug (e.g., methotrexate, leflunomide, hydroxychloroquine, sulfasalazine), or previous treatment with a biologic agent indicated for the requested use  
      ii. Trial and failure with or contraindication to Enbrel and Humira (for polyarticular juvenile idiopathic arthritis only)  
   b. The patient is new to the plan and stable on Actemra and the prescribing physician has documented that changing to a preferred product would result in adverse clinical outcomes

Rheumatoid Arthritis

1. Documented diagnosis of rheumatoid arthritis  
   AND
2. Patient is at least 18 years of age  
   AND
3. Prescribed by or in consultation with a rheumatologist  
   AND
4. Documentation of one (1) of the following:  
   a. Both of the following:  
      i. One (1) of the following:  
         1. Inadequate response or adverse reaction to one (1), or contraindication to all traditional disease modifying antirheumatic drug (e.g., methotrexate, leflunomide, hydroxychloroquine, sulfasalazine)  
         2. Previous treatment with a biologic agent indicated for the requested use  
      ii. Trial and failure with two (2) or contraindication to all of the following: Cimzia, Enbrel, Humira, Rinoq, Simponi, Xeljanz  
   b. The patient is new to the plan and stable on Actemra and the prescribing physician has documented that changing to a preferred product would result in adverse clinical outcomes

Systemic Sclerosis-Associated Interstitial Lung Disease

1. Documented diagnosis of systemic sclerosis-associated interstitial lung disease  
   AND
2. Patient is at least 18 years of age  
   AND
3. Prescribed by or in consultation with a rheumatologist or pulmonologist  
   AND
4. Documentation of one (1) of the following:  
   a. Inadequate response or adverse reaction to at least two (2) of the following agents: Azathioprine, cyclophosphamide, or mycophenolate mofetil  
   b. Contraindication to azathioprine, cyclophosphamide, and mycophenolate mofetil  
   c. Previous treatment with a biologic agent indicated for the requested use  
   d. The patient is new to the plan and has been stable on the requested agent prior to enrollment
Limitations

1. Samples, free goods, or similar offerings of the requested medication do not qualify for an established clinical response and will not be considered for prior authorization.
2. For plaque psoriasis, inconvenience does not qualify as a contraindication to phototherapy.
3. Documentation of a Member being a social drinker does not qualify as a medically acceptable contraindication or clinical inappropriateness to methotrexate therapy.
4. Documentation of a patient having a needle phobia does not qualify as a medically acceptable contraindication or clinical inappropriateness to injectable products.

Background, Product and Disclaimer Information

Pharmacy Medical Necessity Guidelines have been developed for determining coverage for plan benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. The plan makes coverage decisions on a case-by-case basis considering the individual member's health care needs. Pharmacy Medical Necessity Guidelines are developed for selected therapeutic classes or drugs found to be safe, but proven to be effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in the service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. The plan revises and updates Pharmacy Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Pharmacy Medical Necessity Guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern.

Treating providers are solely responsible for the medical advice and treatment of members. The use of this policy is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to member eligibility and benefits on the date of service, coordination of benefits, referral/authorization and utilization management guidelines when applicable, and adherence to plan policies and procedures and claims editing logic.
