Overview

Eustachian tube (ET) dysfunction occurs when the functional valve of the eustachian tube fails to open and/or close properly. This failure is frequently due to inflammation and can cause symptoms such as muffled hearing, ear fullness, tinnitus, and vertigo. Chronic dysfunction can lead to hearing loss, otitis media, tympanic membrane perforation, and cholesteatomas. Balloon dilation of the eustachian tube (BDET) is a procedure intended to improve the patency by inflating a balloon in the cartilaginous part of the ET to cause local dilation.

Clinical Guideline Coverage Criteria

Balloon dilation of the eustachian tube (BDET) may be considered medically necessary for adults (18 years and older) with chronic eustachian tube dysfunction refractory to medical treatment when ALL of the following criteria are met:

The Member has the following:
   o Chronic signs and symptoms of eustachian tube (ET) obstruction such as:
     ▪ Hearing loss or aural fullness for greater than 3 months duration and other causes such as temporomandibular joint disorders, extrinsic obstruction of the ET, superior semicircular canal dehiscence, and endolymphatic hydrops have been ruled out OR
     ▪ There is a history of negative pressure in the middle ear, middle ear effusion for greater than or 3 months duration; AND
   o There is failure to respond to appropriate medical management of co-occurring conditions such as allergic rhinitis, rhinosinusitis, and laryngopharyngeal reflux, including 4-6 weeks of a nasal steroid spray, if indicated AND
There are no contraindications to BDET.

## Limitations
The Plan will not cover balloon dilation of the eustachian tube (BDET) for the following indications:

- Members aged 17 and younger
- Repeat BDET
- BDET for patulous eustachian tube dysfunction

## Codes
The following code(s) are associated with this service:

<table>
<thead>
<tr>
<th>CPT/HCPCS Codes</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>69705</td>
<td>Nasopharyngoscopy, surgical, with dilation of eustachian tube (ie, balloon dilation); unilateral</td>
</tr>
<tr>
<td>69706</td>
<td>Nasopharyngoscopy, surgical, with dilation of eustachian tube (ie, balloon dilation); bilateral</td>
</tr>
</tbody>
</table>

## Approval And Revision History
January 18, 2023: Reviewed by the Medical Policy Approval Committee (MPAC)
Subsequent endorsement date(s) and changes made:
- February 16, 2023: Reviewed by the MPAC committee. Criterion regarding failure to respond to medical management updated to reflect “if indicated” and language regarding “unless contraindicated” is removed. Policy to be effective April 1, 2023.

## Background, Product and Disclaimer Information
Medical Necessity Guidelines are developed to determine coverage for benefits and are published to provide a better understanding of the basis upon which coverage decisions are made. We make coverage decisions using these guidelines, along with the Member’s benefit document, and in coordination with the Member’s physician(s) on a case-by-case basis considering the individual Member's health care needs.

Medical Necessity Guidelines are developed for selected therapeutic or diagnostic services found to be safe and proven effective in a limited, defined population of patients or clinical circumstances. They include concise clinical coverage criteria based on current literature review, consultation with practicing physicians in our service area who are medical experts in the particular field, FDA and other government agency policies, and standards adopted by national accreditation organizations. We revise and update Medical Necessity Guidelines annually, or more frequently if new evidence becomes available that suggests needed revisions.

For self-insured plans, coverage may vary depending on the terms of the benefit document. If a discrepancy exists between a Medical Necessity Guideline and a self-insured Member’s benefit document, the provisions of the benefit document will govern. For Tufts Health Together (Medicaid), coverage may be available beyond these guidelines for pediatric members under age 21 under the Early and Periodic Screening, Diagnostic and Treatment (EPSDT) benefits of the plan in accordance with 130 CMR 450.140 and 130 CMR 447.000, and with prior authorization.

Treating providers are solely responsible for the medical advice and treatment of Members. The use of this guideline is not a guarantee of payment or a final prediction of how specific claim(s) will be adjudicated. Claims payment is subject to eligibility and benefits on the date of service, coordination of benefits, referral/authorization, utilization management guidelines when applicable, and adherence to plan policies, plan procedures, and claims editing logic.
