

New to Zoom? We've got you covered!

In our opinion, the web-conferencing platform *Zoom* does a great job with prioritizing the attendee experience. Most likely it will be the case that joining our sessions feels intuitive, and involves little more than cutting and pasting the provided URL into your browser, and then following the instructions that pop up on your screen.

However, if you find you are having trouble, please consult the following tutorial:

[Joining and participating in a webinar](#)

Most people will choose to join these sessions using the audio speakers built into their computers; however, if you are more comfortable using your mobile phone, please see this tutorial:

[Joining a Meeting by Phone](#)

Once you're in the meeting, which controls are available to you as an attendee will be pretty clear, or should become clear as you poke around.

If you've used Zoom before, we'd recommend starting to log in about five minutes before the session is set to begin. If this is your first time using Zoom, however, you may want to set aside 10-15 minutes to familiarize yourself with the process of logging in before the session is set to begin.
